S. HENCE OF ACCOUNTS.—Book-keeping will be explained from a new stand point, exhibiting the true
mature and relation of accounts; and the course
will embrace some of the best practical forms of
modern accountants. This science is often taught
as if it were a species of conjecture, in which
multiplicity of forms are substituted for principles
arbitrary rules for reasons, and venerable precedents for geomine philosophy, making the whole
field of the science a complete "terra incognita."
